

PVC (Polyvinyl Chloride) Fiberglass Sleeving

Dexlu Item No.: D070101

Properties

PVC fiberglass sleeving is made of the non-alkali fiberglass braided sleeving coated with PVC (polyvinyl chloride) resin after produced with the process of thermo-plasticization. It has a good property of dielectric, chemical resistance, excellent softness toughness and elasticity. This kind of sleeving can be used for wiring insulation and mechanical protection for electrical machinery electric appliances, electrical instruments and apparatus, medical instruments and apparatus, wireless sets, TV sets and for domestic electrical appliances of electrical fans, washing machine etc.
